

Sand-Spread

In conjunction with Transpread International who have over 20 years experience on 4 continents designing multipurpose spreaders, Agrispread offer the next generation of spreaders that bring accuracy and economy to the next level.

Based in Co. Mayo in Ireland Agrispread offer the Turf care Industry a precision built technically advanced sand spreader with a superior finish, giving an accurate spread pattern across a wide range of materials.

Sandspread is a range of spreaders designed for the turf care industry capable of spreading a wide range of materials including sand, compost, lime, mineral dust and more.

For Compact Tractors with a low oil output the spreader can be equipped with its own independent hydraulic system which drives the floor belt and parabolic spinners.

Materials can be spread at widths from 4 to 16 metres and rates of application from 50kg to 60 tonne per hectare in 1 pass are easily obtained.

Standard features

- Hydraulic brakes
